CONSTABLES

Fred W. Bardwell

Edwin A. Graves

Whately Town Warrant

COMMONWEALTH OF MASSACHUSETTS

FRANKLIN, SS:

To Fred W. Bardwell, one of the Constables of the Town of Whately in the County of Franklin,

GREETING:

In the name of the Commonwealth of Massachusetts, you are hereby directed to notify and warn the inhabitants of the Town of Whately, qualified to vote in elections and Town affairs, to meet in the Town Hall in said Whately, on Monday, the second day of February, at ten o'clock in the forenoon, then and there to act on the following articles, to wit:

Article I To choose a Moderator to preside at said meeting.

Article II To choose all necessary Town officers, for the ensuing year: Town Clerk, one Selectman for three years; one Selectman for one year; Town Treasurer; one Assessor for three years; one School Committee for three years; one Library Trustee for three years; one Cemetery Commissioner for three years; Tree Warden; Elector Under the Will of Oliver Smith; Tax Collector and Constables; and to vote on the question "Yes" or "No"—"Shall License be granted for the sale of Certain Non-Intoxicating Beverages in this Town?"

Article III To receive the reports of the various Town Officers and Committees, and act thereon.

Article IV To raise such sums of money as may be necessary to defray the expenses of the Town for the ensuing year.

Article V To see what the Town will do with the money received from the County called the Dog Fund.

Article VI To see if the Town will make an appropriation for the Public Library.

Article VII To see if the Town will raise and appropriate money for the care of the cemeteries for the ensuing year.

Article VIII To see if the Town will vote to authorize the Treasurer, with the approval of the Selectmen, to borrow such sums of money as may be necessary, in anticipation of the revenue of the financial year, beginning January 1, 1925.

Article IX To see if the Town will raise and appropriate the sum of \$175.00 to be paid to the Trustees for County Aid to Agriculture in accordance with the provisions of, and for the purposes of, Chapter 273, Acts of 1918.

Article X To see if the Town will choose a director in accordance with the provisions of Chapter 273, Acts of 1918, to serve for one year.

Article XI To see if the Town will vote to raise and appropriate a sum of money sufficient for Gypsy and Brown Tail Moth work.

Article XII To see if the Town will vote to raise and appropriate a sum of money for Street Lights, and authorize the Selectmen to make a one-year contract with the Amherst Gas Co.

Article XIII To see if the Town will vote to raise and appropriate the sum of \$3,075 for the maintenance of Highways, under the provisions of Section 26-29, Chapter 81, of the General Laws.

Article XIV To see if the Town will raise and appropriate the sum of \$3,000 for the construction of an Improved Road, beginning at the Whately-Hatfield line, on the so-called River Road, going northerly; providing that the State Department of Public Works, Division of Highways, will meet that sum with a like amount, under the provisions of Section 34, Chapter 90, of the General Laws.

Article XV To see if the Town will vote to discontinue the so-called Big Hill, in West Whately.

And you are hereby directed to serve this warrant by posting up attested copies thereof in two public places in said Town; said posting shall be at least seven days before the time of holding said meeting.

Hereof, fail not, and make due return of this Warrant with your doings thereon, to the Town Clerk, at the time and place of meeting, as aforesaid.

Given under our hands this seventeenth day of January, one thousand nine hundred and twenty-five.

WILLIAM G. STRIPPE,
HOMER L. CRAFTS,
MORRIS POWERS,

Selectmen of Whately.

ARTHUR A. WOOD,

Assessors.

Report of Cattle Inspector

To the Selectmen of the Town of Whately:

Herewith find my annual report as Cattle Inspector.

The general inspection of barns and herds was made during February and March of 1924, at which time I found 790 cattle, 27 swine and 31 sheep in 110 different stables.

Suggested improvements seem to, in nearly every case, be well received.

Twenty-four cows have been quarantined, condemned, and killed during the year, a decrease of one from last year.

No rabies, hog cholera or jaunders have been reported during the year and I earnestly hope you will call the Inspector's attention to any suspicious cases.

Respectfully submitted

WM. E. SANDERSON

Inspector of Animals

REPORT OF

**Gypsy and Brown Tail Moth
Superintendent**

To the Selectmen :

The number of nests found and destroyed is 332. We found them scattered in all parts of the town but in larger numbers through Claverie and East Whately, the largest number being found in J. A. Wood's orchard.

We would ask for a generous appropriation as more time must be spent in the wooded section of the East part of the town this spring.

Respectfully submitted

JOHN J. FINN

Superintendent.

REPORT OF THE
County Agricultural Agent

TOWN OF WHATELY

1924

An Extension School and Community Meeting was held at which Professor Slagg spoke of the experimental work in tobacco in developing special strains. It was brought out that large amounts of Acid Phosphate appears to be slightly injurious, and some of the Phosphoric Acid had better come from the precipitated bone. Frequent applications of fertilizer are more efficient than when it is all applied at one time. Cow manure when used as fertilizer was a most efficient fertilizer.

A Bull Committee to assist in improving the quality of the bulls was appointed, and a card list made of the bulls in the town. It is hoped to follow this up more closely. It is planned to visit every bull owner in town before the end of the year. It is hoped to follow this up more closely.

A Field Meeting was arranged at the Tobacco Experiment plants at Mrs. Crafts. The difference in the growth of tobacco following various crops was very striking, and we understand that this has been quite consistent for three years. Every tobacco grower in the county could have well afforded to have taken time to have visited these plots. Dr. Johnson of the United States Department of Agriculture spoke at this meeting.

A program was furnished for the Whately Grange.

In general the work in the county has suffered a great loss in the resignation of Joseph W. Stevens because of ill health. Fred W. Burnham of Greenfield has been appointed in his place as President of the Board of Trustees.

An Assistant Club Agent, Ula Fay, has been added to the staff.

Especially hearty cooperation has been given by other organizations in the county interested in promoting rural welfare. We worked with the Farm Bureau in securing a choice lot of seed potatoes and also in the propaganda for standard time.

The Co-operative Exchanges did a business of \$260,000. The Eastern States Exchange has rendered real service in its grain and fertilizer distribution. The Springfield Milk System started under very unfavorable conditions, but results are improving. The Greenfield Chamber of Commerce put on the merchants' window display during "Apple Week" and is assisting in helping the onion situation.

The program of work consisted of: 15 demonstrations in potatoe growing; 22 in Forage Crops; 35 in pastures; 43 in soils; 53 in apples; 27 in small fruits; 15 in poultry and 4 in gardening. 700 bulls have been catalogued in the country and many of these visited and assistance given in making changes. 50 farm surveys have been taken.

The use of Acid Phosphate on fairly moist pastures has proven profitable. The use of Nitrate of Soda and Acid Phosphate for topdressing grass has again given profitable results. Alfalfa fields are more successful and the growing of clover with lime has increased. Certified Seed potatoes gave very satisfactory results. Dusting potatoes showed a profit in spite of no blight. The introduction of the home-mixing of the dust has reduced the expense. Ditch blasting demonstrations with the use of dynamite have been successful.

The demonstration orchards are for the most part proven very successful. The proper pruning, grafting, spraying, thinning and fertilizing has been demonstrated all over the country.

We have worked with the New Salem Academy in the development of a Raspberry Project in that section of the county, and it is proving to be a very successful and profitable crop.

250 cultivated blueberry plants have been distributed to 26 growers and the results will be carefully followed for the benefit of all. Assistance has been given in the growing of garden crops and ornamental gardening.

Considerable time was spent on the Cow Test Association, assisting in securing members and testers. The "Better Bull Campaign" has been conducted and 700 bulls card indexed. This will be pushed another year. County Breed Clubs were given assistance and also the various Fairs and Grange Fairs in the county.

The 50 Farm Surveys taken in the towns of Shelburne and Heath are giving some very valuable material on farm methods and management. As usual Extension Schools, Field Meetings and Tours were held. The Tour, by delegation of the American Pomological Society being especially notable.

County Club Agent's Report

OF CLUB WORK

FOR THE TOWN OF WHATELY

1923---1924

A very successful Supper Club, consisting of eight members, under the leadership of Miss Edna Dickinson, was organized and held regular meetings during the winter of 1923-24.

During the summer months there was the following enrollment in the clubs:

- 2 Canning Club members
- 6 Garden Club members
- 11 Poultry Club members
- 4 Dairy Club members

- 1 Sheep Club member
- 1 Corn Club member
- 2 Onion Club members

Very successful work was done by all of the members of the clubs.

REPORT OF THE
Home Demonstration Agent
TOWN OF WHATELY

1924

A community Meeting was held when the Extension Service Play was presented. A demonstration in the making of jams and jellies was given by the Extension Specialist in Horticultural Manufactures.

To summarize Home Demonstration Work in Franklin County for the year 1924, several important aims have been achieved:

Millinery schools have been held for the purpose of teaching leaders the millinery work so that they might conduct group meetings in their own communities. These leaders have had very successful results in conducting this project in their communities.

Similar schools in clothing (called local leaders training schools) were conducted in the children's clothes project, the advanced clothing project has just been started by this method. Very successful results have been accomplished in this method of carrying the clothing project. Much credit is due the leaders who have so very conscientiously conducted meetings in their communities following these schools.

Phases of the Food Preservation project have been demonstrated in six communities. These demonstrations were attended by 103 persons. Demonstrations were given in the

canning of meats, greens and asparagus, and in making of jams and jellies. Many problems in home canning were solved for those attending the demonstration.

The Food Selection project was carried by six towns with the result that about 275 persons received all or part of the information discussed at the meetings.

Clothing and Millinery was carried on in 32 communities with 295 women in the groups. Two hundred and fifty hats were made at an average saving of three dollars per hat.

A new project, Furniture Renovation and Reseating of chairs was started this year in seven communities. Seventy persons have received instruction in this project.

Several very successful county-wide meetings were held. A local leaders' conference was held in the spring for the purpose of bringing the leaders together from all over the county to discuss Extension Work from a county, state and national viewpoint, to confer with the state leader and specialists.

A county wide Millinery Meeting was held attended by 135 women. This meeting was conducted by a millinery specialist from Boston, who presented the principles underlying the choice of a hat, and the season's materials and frames for hats.

The Summary Day held in the form of a Field Day at Mt. Sugar Loaf was particularly successful in showing the results of the projects completed by June. It was attended by nearly one hundred, a rainy day preventing more from attending.

REPORT OF THE

Superintendent of Schools

To the School Committee:

It becomes my duty to report to you and thru you to the people of the town, the progress and condition of the schools, and to suggest needed improvements.

In making a report of this kind one wonders whether it is better to make a brief summary of the work done and the progress of the schools making a few specific suggestions for the improvement of the school, or to discuss educational procedure. It is always a pleasure to write about movements in the educational field, but perhaps in so doing, one is in danger of subordinating the more important questions before the town.

It has been some time since the Whately schools were in as good a condition on the whole as during the present school year. The improved school spirit and the growing desire for higher education has increased the number of pupils from the town who attend high school. This has materially raised the expenses for schools and the appropriation will continue to increase for the next few years. The state is making a strenuous effort to assist the more burdened towns, but a town situated as is Whately with a rapidly increasing school population and a slowly increasing property valuation is greatly hampered by this great school expense. As long as the valuation of the property of the town remains under one million dollars the state pays three-fourths of the high school tuition, but one half when the town's valuation goes over one million.

HIGH SCHOOL

Pupils in the High Schools:

Deerfield 11

Greenfield 7

Northampton 11

Smith School 9

Most of the pupils from last year's graduation class entered Deerfield High School. I am positive that these pupils are being better looked after and getting work more suited to their abilities than they would in the larger high schools. They have also a greater part in the school activities than in the larger schools. The new Deerfield school is very finely equipped both in its faculty and laboratories. There is a good business course from which a pupil should secure a position and also a strong preparatory course for both college and normal school.

In order to conveniently transport the pupils from East Whately to Deerfield High School, a truck was secured to bring to the pupils who lived more than a mile and a half from the East school and take the high school pupils on to South Deerfield. This truck also carried back and forth to East School, a teacher who could not find a place to live in East Whately. The large increase of High School pupils is the cause of the substantial increase asked for to run the schools next year.

TUITION PUPILS

Nearly forty children from the northern part of Whately are attending the South Deerfield graded schools. The tuition for these pupils has been advanced to \$60.00 per week for forty pupils. This is still below the average cost per pupil in the Whately schools.

CENTER

This fall, the Town Hall school was again opened and the children from Center were divided into three schools. This is of great benefit to the pupils of the center. With four grades in a room, it is impossible to accomplish satisfactory results with the class of pupils now in the public schools. Two grades in a room works finely but when there are more than two, the class period is, by necessity, so short that the slower pupils fall behind. The brighter and more rapid pupils will get along in any graded room, but the less acute will be unable to make their grade.

The Center schools are under an efficient trio of teachers and are making good progress. We were fortunate in getting Mrs. Jessie White, an experienced teacher and a conscientious worker for the grammar school. Mrs. Argie Strippe, who had done splendid work at West Whately, was given the Intermediate school.

WEST

An effort was made to close the West Whately school and transport the children to the Center. This would have been a financial saving to the town and the children would have had better school conditions. Although the time to get a teacher for the opening of school was short, we were successful in securing the services of Miss Bessie Cutler, who is doing excellent work in the West school.

EAST WHATELY

The Eastern part of the town continues to increase in school population. There are five rooms, filled to their capacity in operation in that building at present.

Grades 1, 32

Grades 1-2 34

Grades 3 37

Grades 4-5 40

Grades 6-7-8 27

The eighth grade in the 4th room is small and the 5th grade which is to enter in the fall is very large. It will be impossible to have the 6th and 7th and 8th grades together in one room next year. If the usual number of children enter in the fall, school accommodations for the 8th grade next year will have to be arranged for.

The order in the East school is good and a pleasant school spirit prevails among the pupils. The people in this part of the town have too many holidays for the best results in school work. Our new attendance officer is reducing the absences.

SOUTH SCHOOL

The spirit in the South School has always been excellent. The pupils are in earnest and the discipline is not difficult. Miss Murphy closed a very successful year in June but would not return. We were able to secure a teacher of some experience from New Hampshire to take the school. In a school of eight grades, it is impossible for a teacher to prepare properly for High School any except brilliantly endowed pupils. In many graded schools, the average and slow pupils have to remain in the grades so long before they are ready to do the work of the high school that they lose their ambition. In fact, after pupils pass the age of 15, they should be removed from the grammar school.

HEALTH

We have a most efficient school nurse in Miss Smith, but I am positive it is to the advantage of the town of Whately to unite with the town of Sunderland and others and employ a full-time nurse. The expense would be only slightly more and the town would have a nurse within call at any time.

THE RECITATION

The recitation is the time in the day's program when the different individuals of the class contribute something to the interest and welfare of the class. Children grow best in con-

tact with others. A class where each one contributes something is a bee hive of activity. The class where the teacher asks all the questions and pupils answer the words in the book is a thing of the past and does not belong to the modern school. The problem which touches the life of the members of the class, stirs the best kind of attention. Pupils get different views of the question and states it, others add and make corrections. The stating of a refutation is evidence of forcible, independent, straight thinking, which is worth a hundred times more than reproduction from text.

THINKING STRAIGHT

The type of mental discipline which is secured by a pupil in his oral or written recitation required to talking to the point, can not be overestimated. Allowing the pupils to get up, talk all around a question, say the same thing over and over and call it a recitation, breeds mental carelessness and intellectual looseness which has disastrous mental results. This situation produces the bluffer, the sloppy thinker and it puts quantity above quality.

Seeing the point and carrying it thru to the end, using only the words necessary and "Hitting the Bullseye" is an important part of the class recitation.

In closing this report, I wish to thank the teachers, committee and all others who have contributed to the advancing of the cause of education in the town.

Respectfully submitted,

ANDREW S. THOMSON,

Superintendent of Schools

REPORT OF THE
School Nurse
OF WHATELY

Mr. Andrew S. Thomson, Supt. of Schools,

Dear Sir :

Out of forty-nine seriously underweight children referred to the Chest Examination Clinic, forty-seven were examined. Those children found in need of care, or advice of any sort, are receiving it. A large number were found to have enlarged tonsils. The parents were promptly informed, if removal was necessary. Four children were taken to the Westfield State Sanatorium for X-ray pictures.

Frequent inspections were made for evidence of communicable diseases, contagious sores, etc. The vaccination law is being rigidly enforced.

An effective school health program calls for many more days of school nursing service than the town is now receiving.

Every child should be Schick-tested to see if he can have diptheria. Those who can have diptheria should be given the Toxin-Anti-toxin treatment. Both the test and treatment are simple and harmless. Best of all the treatment will absolutely protect children from having diptheria.

Whately loses children as well as money every time diptheria invades her borders. How long before Whately will stamp it out, through the Schick test and Toxin-Antitoxin Treatment?

My thanks are due to parents, teachers, the School Committee, Board of Health, School Physician, and School Superintendent for their constant cooperation.

Following is the statistical report:

Every child has been weighed and inspected. Those markedly under weight have been weighed repeatedly	782
Special inspection in addition	191
No. of pupils referred to family physician	57
No. of pupils referred to school Physician	10
No. of pupils given first aid	7
No. of pupils recommended for exclusion for health disabilities	22
School Physician assisted with inspection of School visits	265 64
Home visits	100
No. of interviews with officials	6
No. of Health Talks to groups	10
School Physician assisted with vaccination	29
School Physician and specialist assisted with removal of adenoids	1
No. of sight and hearing tests	74
No. of pupils taken home from school	3
No. of pupils referred to chest examination clinic	49
No. of days of school nursing service	27

Respectfully submitted,

ELSIE F. SMITH, R. N.

Supervisor of Music

Mr. A. S. Thomson, Supt of Schools:

Dear Sir:

Music is holding its own in the schools of Whately there being everywhere a gain over the work of last year. The East School takes a forward step each year, the ungraded schools are doing well, and the closer grading at the Center give a much better chance for improvement there.

As the schools increase in number it becomes more difficult, after allowing for recessed and the early dismissal of the lower grades, to confine my visits to one day but by allowing twentw minute lessons in some classes and thirty minutes in others I can just do it. The usual number of visits have been made,. When weather conditions interfered with reaching any school, the time is added to those within reach.

Music has been prepared for special occasions as they have occurred during the year. We shall later prepare for the second time a program for music week, which is fast becoming an annual National Celebration.

Yours truly,

BELLE T. BULLIS

Supervisor of Music.

Statistical Table for 1923-1924

Name of School	Total Membership	Average Membership	Average Attendance	Percent Attendance	Name of Teacher	Salary
West Whately	20	18.32	17.80	97.16	Argie Strippe	\$ 900
